Estefania Yepiz

Frontend Developer | React, TypeScript, Tailwind | Crafting modern, interactive UI experiences | Open to Work
Fontana, California, United States

Summary

Frontend Developer focused on building modern, responsive web applications using React, Tailwind CSS, and JavaScript. I have experience working across the full stack, including React, Vue, Node.js, AWS, and Docker, and enjoy turning complex ideas into clean, intuitive user interfaces. After working as an IT consultant in remote environments, I recently relocated to the U.S. and have been rebuilding my portfolio with projects focused on UI/UX, animations, and real-world functionality. Currently focused on:

- Building polished, production-ready frontend applications
- Creating interactive UI experiences using Framer Motion
- Strengthening modern frontend architecture skills

I'm actively seeking opportunities as a Frontend Developer where I can contribute, grow, and build impactful user experiences. Open to remote and on-site roles | Bilingual (English/Spanish)

Experience

LX Pantos Americas

IT Clerk

August 2025 - April 2026 (9 months)

Fontana, CA
